Executive Summary (250 words max)

Please provide an overview of the project explaining what made it an environmental best practice and highlighting any specific processes used, as well as any innovations, technology or equipment.

Please outline the specifics of the asbestos, demolition or green working practice used and the environmental benefit it provided.

Explain how you managed the project with respect to the client, general public and regulatory requirements.

Please describe any challenges you encountered and explain how you overcame these to complete the project on time, on budget or safely.

Please include any results or measurements that highlight the overall success or demonstrate your commitment to reducing environmental impact.

Please list the additional support material or information you are sending and would like considered to support this entry.
